## SANITARY CIRCUMSTANCES OF THE AREA

### Water Supply.

Supplies of water continue to be satisfactory in quantity and quality. Three samples of water examined bacteriologically were found to be sterile.

The only extensions to public water supplies in 1965 were minor ones on housing estate development.

### Sewage and Sewage Disposal.

No major extensions or improvements to sewers in 1965. New lengths of storm water sewer were laid and foul sewers extended for housing estate development.

At the Sewage Disposal Works, the construction of two additional percolating filters was completed during the year.

### Public Cleansing.

This service is administered by the Engineer & Surveyor. House refuse is collected by direct labour on a weekly basis and is disposed of by controlled tipping.

The same labour force also collects 246 bins of trade refuse from 148 properties weekly. A charge is made of £2.5.0. per bin per annum for this service. The trade refuse scheme is operated by the Health Department, as is also the Council's dustbin scheme. For a charge of 6/- per annum this latter scheme offers the ratepayer an alternative to the purchase of his own house refuse bin. At the end of the year 2406 Council dustbins were in use at 2263 properties.

Notices were served in respect of 263 contraventions, 94 of these were remedied by the end of the year. The figure of 263 might appear high in relation to the number of premises, but it includes all items such as non-provision of thermometers, first-aid boxes & Abstracts as well as contraventions of a more serious nature. On the whole standards were found to be good.

Three accidents of a minor nature occurring on registered premises were notified during the year.
